

PERMAMELT™

PORTABLE HOT MELT SYSTEM

Permamelt™ is a portable hot melt dispensing system that features an all electric / low voltage operation, a heated hose and a heated material bin.

Permamelt™ Product Features:

- * LONG LASTING / IMMEDIATE USE SOLUTION
- * APPLIED HOT, TRAFFIC READY IN MINUTES
- * WORKS IN CONCRETE CRACKS & JOINTS
- * WITHSTANDS HI OR LOW SLAB TEMPERATURE
- * EASY REPAIRS - CAN BE RE-HEATED
- * LIGHT GRAY COLOR FOR CONCRETE USE
- * OTHER COLORS AVAILABLE ON REQUEST
- * BLACK PERMAJOINT™ AVAILABLE FOR ASPHALT
- * MEETS APPLICABLE ASTM, AASHTO, FEDERAL & STATE REQUIREMENTS
- * FOR RESIDENTIAL & COMMERCIAL USE

GRAY PermaMelt Material

Optional 100 lb. Material Hopper available for convenient refilling.

For use on driveways, sidewalks, highways and airport runways & more!

PermaMelt™ offers a custom-fit, immediate use, long lasting & durable expansion joint.

PermaMelt™ HOT MELT SYSTEM

Description: The PermaMelt™ hot melt system is a low voltage, light-weight / portable unit for extruding of a high viscosity adhesive sealant material on demand. It can be used to fill expansion joints in concrete, mounting roadway markers, filling cracks or holes in asphalt or concrete as well as the sealing traffic signal loops. It can also be used for an endless number of tasks for construction jobs for bonding materials together or even doing repairs where adhesives such as a urethane, calk or glue are typically used but with one major advantage, almost immediate bonding and use.

This all-electric system is a light weight, mobile hot melt delivery system that features low voltage customer supplied power that can maintain material at application temperature. No compressed air and no gas-fed or direct fire heating is required.

The PermaMelt™ system consists of a weather resistant mobile melting unit featuring a sixteen foot jacketed hose with a long-life cool-touch plastic shielded sleeve. A handgun applicator is supplied with each unit with an optional three foot wand available as an upgrade. The applicator is designed for maximum accuracy along with operator comfort. A check valve in the tip allows for immediate cut off of material which prevents dribbling and dripping from tip of gun.,

PERMAMELT™ SYSTEMS ARE CUSTOM BUILT TO ORDER:

Part number and description: PermaMelt™ Rover

#PM-Rover - PermaMelt™ weather resistant manual unit, 110 VAC, 16 foot shielded and heated hose, applicator gun with tip mounted on sturdy metal dolly.

FEATURES AND OPTIONS - Standard Components

The PermaMelt™ Hot Melt System includes the following features:

350 Degree (F) Temperature / Standard operation

Adjustable thermostat temperature control

1/3 HP all electric motor

Custom built / light-weight cart system

Power on/off operation

16 linear foot. Heavy duty heated hose & gun

PermaMelt™ is made in the U.S.A.
